Load the Saf-T-Log software* onto your computer and start building a custom checklist. Connect Saf-T-Log (via USB) to the computer and download the list you just created.

Scroll to the food item, insert the probe and press record. Scroll to the next item or question and repeat. It's really that easy!

Reconnect Saf-T-Log to your computer and temperature readings automatically download. Store them electronically. You can also email them to a centralized location. You may even choose to print - if you hate trees.
