

RT304 Water Resistant Thermometer

Instrument Operation

Press the ON/OFF button to activate the thermometer. The unit will remain in the ON position until switched off by the user. Insert the stainless steel probe about 25mm (1 inch) into the object to be measured. The measured temperature will be shown on the LCD display.

To Select °C or °F

Press the °C/°F button to select the desired temperature unit.

Using MIN-MAX

Press the MIN/MAX memory button to read the last highest / maximum temperature measured.

Press once more to read the last lowest / minimum temperature measured.

Press once more to return to normal display.

Press and hold the button for about 3 seconds then release to reset the memory.

Battery Installation

Replace the battery if the LCD display becomes dim.

Replace with 1.5 volt, type A76 or equivalent.

Use a coin of suitable size to open the battery cover on the back.

Install the battery observing the correct polarity.

Close the battery cover.

Care and Cleaning

Clean the probe immediately after each measurement to avoid cross contamination.

Do not expose the entire thermometer to temperatures over 122°F / 50°C.

Do not use inside ovens. Not submersible.

Specifications

Measuring Range	-58 to 392°F / -50 to 200°C
Accuracy	±2°F between -40 to 302°F, otherwise ±4°F ±1°C between -40 to 150°C, otherwise ±2°C
Display Resolution	0.1°
Display Reading Update	1 second
Battery	1.5 volt, type A76 or equivalent x 1 piece (included)
Battery Life	About 5,000 hours continuous operation
Water Resistance	IP 67
Display Size	18 (w) x 8.5 (h) mm
Probe Size	0.137 (∅) x 4.75 (L) inches 3.5 (∅) x 120 (L) mm
Product Size	1.7 (W) x 0.75 (D) x 7.5 (L) inches 41.5 (W) x 17 (D) x 189 (L) mm (including probe cover)
Operating Range	32 to 122 °F / 0 to 50 °C

Features

- IP 67 Water Resistant
- On/Off Switch
- Max. & Min. Memory
- °C/°F Switchable
- -58°F to 392°F Range
- Includes Pocket Clip
