

Pro-Series Ambient Probe

Designed specifically for measuring all things ambient. It is perfect for monitoring refrigerators, freezers, coolers, chillers, and any other type of cold storage system. It is also great for incubators, terrariums, and hundreds of other uses wherever you want to make sure an acceptable temperature range is maintained.

Instructions, Tips and Cautions

- Do not use in oven/smoker or for cooking.
- The cable can be closed in a refrigerator or freezer door.
- Do not pull on the cable. Use the molded mini-handle.
- The cable will withstand temperatures to 158°F.
- Probe can be immersed in water. IP67 rated.
- Clean probe by wiping with damp cloth and kitchen cleaner. Can be immersed but do not clean in a dishwasher.
- Avoid repeated kinking or twisting of the probe cable which can break wires.
- With care, the probe should last a long time. Eventually, you may need to replace it. If the probe becomes damaged, the base unit will flash "NO PROBE" on the display. Affordable replacements are available. Use only ThermoWorks Pro-Series Probes.

CABLE SHOULD AVOID:

Specifications:

Cable Max Temp	158°F (70°C)
Transition Max Temp	158°F (70°C)
Probe Range	-58 to 158°F (-50 to 70°C)
Cable Length	47 inches (1.2m)
