## Battery Information

### BATTERY WARNING

This data logger contains a lithium battery. Do not cut the battery open, incinerate, or recharge. Do not heat lithium batteries above the specified operating temperature.\* Dispose of the battery in accordance with local regulations.

\*See the individual specification sheets at [www.thermoworks.com](http://www.thermoworks.com).

## Battery Replacement

This product does not have any user-serviceable parts except the battery which should be replaced periodically. The battery life is affected by battery type, ambient temperature, sample rate, sensor selection, off-loads and LCD usage. The device has a battery status indicator on the LCD. If the battery indication is low, or if the device seems to be inoperable, it is recommended that the battery be replaced.

To replace the battery, locate the battery compartment cover on the back of the unit. Remove the two (2) 3/32 hex screws and expose the battery compartment. Use the pull tab to remove battery from compartment. Remove the old 9V battery from the battery clips and replace with a new 9V battery. We recommend using 9V lithium battery. An alkaline battery is acceptable, but will yield a shorter battery life.

## Computer Interface

Fully insert the male connector of the IFC200 interface cable into the female receptacle of the data logger. Fully insert the female USB connector into the USB. (*Please see the Data Logger Software manual for further information.*)

**\*WARNING:** *Install driver before connecting a device using a USB for the first time. See the Software manual for further information.*
