

ThermoWorks

Square DOT[®]

2-Channel Alarm Thermometer with Averaging Function

Average Mode

Place channel 2 in Average mode to easily calculate your oven or smoker's 15-minute running average temperature.

Large Display

Current temperature of both channels displayed with big digits for easy reading.

Bright Backlight

Press any button to activate backlight.

Loud Audible Alarms

Audible alarm sounds at 70dB when set temp is reached.

Water Resistant

Molded-in seals protect against kitchen spills and splashes.

Easy to Use

Each channel has just two buttons—up and down—to set your high alarm.

High Alarm Temperatures

High alarm temperature is displayed here.

Pro-Series[®] Probes

Includes Pro-Series High Temp Straight Penetration Probe and Pro-Series High Temp Air Probe with Gate Clip. Works with all other Pro-Series Probes.

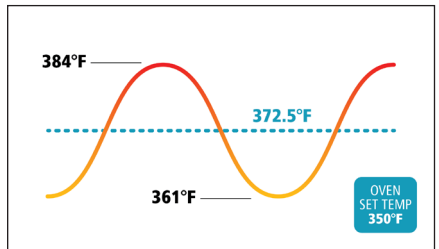

Long Battery Life

Powered by 2x AAA batteries, up to 5,000 hours of battery life.

Verified Accuracy

Includes NIST-traceable calibration certificate verifying performance.

Match Your Probe to Your Application

ThermoWorks' Pro-Series thermistor probes are the industry standard for accuracy and durability. Choose from a wide variety of optional probes specifically designed for BBQ, oven-roasting, deep frying, candy making, and more.

Your Oven is a Liar

All ovens fluctuate up and down and can easily drift out of calibration. Square DOT's average mode tells you what the actual average temperature is so you can calculate your offset for perfect results.
