# TimeStack™

## Four-Channel Timer

Four independent timers displayed simultaneously with no tedious toggle buttons.

Press Set button once to recall last count-down setting. Press again to enter a new alarm.

Big digits are legible at a distance and flash until the alarm is disabled.

Handy Backlight button to see in low light.

Choose from 4 volume settings.

Quick-set numeric keypad stores alarms quickly without scrolling or fiddling with Hour, Minute, and Second buttons.

Molded-in seals protect against kitchen spills and splashes.

Audible alarms up to 100dB for noisy environments.

Flashing lights and display give a visual cue when alarm sounds.

Count-up after alarm so you'll know how long the alarm has been sounding.

Stands upright on the counter or grips securely to a metal surface with strong magnets.

Record your own voice alarms; a separate one for each channel.

### Rugged Housing

Designed to survive years of daily use, the TimeStack has a rugged, splash-proof housing that includes molded-in seals and rubber buttons for wet fingers.

### Record Your Own Voice

Four distinct alarm sounds that tell you which timer is alarming; or record your own voice-alarm for each channel and know exactly what item to check by name.
