

**ThermoWorks**

# ThermaQ®

Made in the U.K.

Two type K thermocouple probes are more accurate and last longer than houseware models.

Max temp display shows you how hot your food (or fire) got when you weren't looking.

Recall your starting temp with the "Min" temp display.

Easily read current temperatures for both channels with large clear digits.

Bright backlight for shadows, dusk or darkness.

Adjustable alarm volume 4 levels up to 100dB.

Set the high alarm to sound when you hit the target temperature.

Set a low alarm to sound when temperature drops below a target.

3,000 hour battery life ensures ThermaQ won't stop working when you need it most.

Rugged housing and molded-in seals protect against kitchen spills and splashes.

**\*Protect ThermaQ from drops with the included silicone boot.**

#### Display

ThermaQ's large backlit digital display shows more information than any other dual channel thermometer. Without pressing confusing buttons see current temperatures (in both channels), Min/Max, and track HI and LO alarms.

#### Versatility

With literally hundreds of type k thermocouple probe options, ThermaQ has a solution for every possible temperature taking application. It's perfect for BBQ, sous vide, deep frying, grilling and much more.

#### Durability

Molded-in seals and a rugged plastic housing make the ThermaQ one tough temperature instrument. It survives drops, spills, splashes and holds up to years of daily use in commercial environments.
