

ThermoWorks

ThermaData® WiFi

Wi-Fi Connected Data Logger

Access Temperature Data Worldwide
Use your existing Wi-Fi network and router.
No gateways or monthly cloud storage fees!

Easy to Read LCD
Big digit LCD screen displays current temperature, Wi-Fi connection status, memory status, remaining battery, & alarm condition.

Choose Your Logger Type
Select from fixed thermistor probes, ambient sensors, or removeable Type K or Type T thermocouples. Ranges from -40 to 2500°F.

NEW! Auto-Archive
Retrieves and archives data automatically from logger.

Built to Last
ThermaData WiFi loggers are rugged, durable, and splash-proof.

API Available for Integration
Can be integrated into existing apps—call for details.

Programmable High & Low Alarms
Email, text, and mobile alerts when alarm limits are exceeded.

Store up to 18,000 Readings on Board
If transmission is interrupted, store up to 9,000 readings per channel on board for later download.
Uses 2x AA batteries, 12 months typical.

Store & Display Max & Min Values
Display Max/Min for quick recall. High accuracy to $\pm 0.9^\circ\text{F}$ ($\pm 0.5^\circ\text{C}$).

Hundreds of Optional Probes
Find Type K thermocouple probes for cooking, roasting, cold/hot holding, ovens, prep areas, and more at ThermoWorks.com.

Included Calibration Certificate
Each logger comes with a 2-point NIST-traceable calibration certificate to certify its accuracy.

Fridge/Freezer Monitoring
Use in walk-ins, freezers, cooking areas, prep areas, cold holding, ovens, cook-chill, and much more!

ThermaData Studio Included
Connect up to 40 qualified temperature recording devices to a single software portal, the ThermoData Studio Software Suite. You set up your own dashboard view. Access Wi-Fi data from your desktop anywhere in the world.
